

Uminova Innovation as a partner in Enterprise Europe Network offers You as enterprises, SME:s and Start-Ups to participate from your homeplace in an extended digital matchmaking event 22 October 2020 - 29 March 2021 at the “Healthcare Brokerage event MEDICA 2020” .

That´s partly in parallel with MEDICA 2020 in Düsseldorf at 16-19 November, one of the world's largest trade shows in medtech, healthcare and medicine.

Please note - Compared to earlier made matchmaking events at the fair in Düsseldorf: The event is prolonged, and this time only made digital, to avoid the risk of spreading the Corona virus.

That is to give you an extended and interesting possibility, to attend digital for potential international meetings, identifying for potential partnerships, customers, clients, regarding new services, technology, products, or research – all to strengthen your business.

The matchmaking will offer healthcare executives and key opinion leaders as well as promising companies, and investors the possibility to do 1:1 meeting in “virtual person” i.e. digital in pre-arranged 30 minutes meetings. The integrated virtual meeting solution offers participants the possibility to manage their foreseen face-2-face meetings via video calls. It runs in all Internet Browsers (but not yet the b2match App). No installation of additional software components is required. To give you more flexibility the digital matchmaking is possible in 2020 at Oct 22, Nov 3, Nov 16 – 19 and in 2021 at Jan 14, Jan 27, Feb 16, Mar 11, Mar 29.

Please note - Deadline for registration is Nov 19 the latest.

To make our offer even more attractive. All participants who inform us later, about made cooperation(s) coming from the virtual meetings, and confirm this in writing in a document, will get back their registration fee.

For more information about EEN's Healthcare Brokerage Event MEDICA 2020 and registration, please contact Business Developer Kurt Strömngren, kurt.stromgren@uminovainnovation.se. Please also take a look at <https://medica2020.b2match.io/>
